2019

95.6%

EXPERIENCE

PAPER 2 PUBLISH

Feb-April 2021

Web-Development Intern

- Structured and reviewed the pages. Had regular discussions with peers and mentors for discussing new ideas.
- Built and deployed the site using google sites platform with better SEO.

PAVITA'S

June-Oct 2020

Freelance Designer

- Shaped, optimized and designed the company's logo, packaging for more than 21 products and business cards that communicate their brand value.
- Proposed and influenced new ideas and advertising strategies for social media which added 100+ followers on Instagram.

PROJECTS

Learning Management System

- Developed a LMS web application that uses a secure login and authentication method of JSON Web Token (JWT).
- Implemented loading and rendering of course pages on from document-oriented database and embedded YouTube videos.
- Integrated cloud MongoDB cluster for storing user credentials hashed with Bcrypt hashing algorithm and hosted the application on Heroku for 24/7 availability.
React.js, Express.js, Mongoose, MongoDB, Redux, and Bootstrap.

Enterprise Invoicing Application

- Created a 3 in 1 desktop application for invoicing, customer management and expense tracking for small scale businesses.
- Incorporated Gmail API for sending generated PDFs to the customer via email from within the application.
- Wrote a program to create database of 1000+ products by scrapping data from web.
- Offer more than 30+ unique combination of invoice templates.
Python, Java, Javafx, SQLite, MySQL server and Maven.

Notes Web-Application

- Designed a simple single page note taking application with modern UI/UX.
- Implemented CRUD operations for notes and a signup-login functionality for isolating user data access.
React.js, Express.js, Mongoose, MongoDB, Redux, and Firebase.
